Classification of chemical substances

List of english names in alphabetical order

The classification list provided in this document was compiled in response to requests for information concerning classifications under federal legislation on controlled products. Please note that this is not an exhaustive list of hazardous products according to WHMIS 1988.

This classification was established by CNESST personnel to the best of their knowledge based on data obtained from scientific literature and it incorporates the criteria contained in the *Controlled Products Regulations* (SOR/88-66). It does not replace the supplier's classification which can be found on its Material Safety Data Sheet.

You can press the name of any product in the list to obtain his WHMIS classification.
